AOSE Construction Permit Approval Letter

November 17, 2006

Fresta Valley Christian School, Inc.
6428 Wilson Road
Marshall, Virginia, 20115

Subject: Sewage Disposal System Permit, SD-05-316
Pin# 6956-25-6041 & Pin# 6956-24-1534

Dear Sirs:

This letter, in conjunction with the approved plans PE stamp dated July 04, 2006, by Gerald T. Sossong PE, named: Fresta Valley Christian School, which are attached, constitutes your permit to install a sewage disposal system. The application for a permit was submitted pursuant to §32.1-163.5 of the Code of Virginia which requires the Health Department to accept private soil evaluations and designs from an Onsite Soil Evaluator CPSS or a Professional Engineer working in consultation with an CPSS. The permitted site was certified as being in compliance with the Board of Health's regulations (and local ordinances if the locality has authorized the local health department to accept private evaluations for compliance with local ordinances) by: Alex C. Blackburn, Certified Professional Soil Scientist, (540) 955-2687. This letter is issued in reliance upon that certification.

The Board of Health hereby recognizes that the soil and site conditions acknowledged by this correspondence, and documented by additional records on file at the local health department, are suitable for the installation of onsite sewage disposal systems. The attached plat (or plats) shows the approved areas for the sewage disposal systems. This letter is void if there is any substantial physical change in the soil or site conditions where a sewage disposal system is to be located. If modifications or revisions are necessary between now and when you construct your dwelling, please contact the CPSS or Professional Engineer (PE) Gerald T. Sossong, 703-862-6569 who performed the evaluation and/or design on which this permit is based. The name, address, and

phone number of the CPSS/PE appears on the certification form or within the attached plans of this permit. Should revisions be necessary during construction, your contractor should consult with the CPSS/PE that submitted the site evaluation /design. The CPSS or PE is authorized to make minor adjustments in the location or design of the system at the time of construction provided adequate documentation is provided to the Fauquier County Health Department. This authorization is null and void if conditions are changed from those shown on the application or conditions are changed from those shown on the attached construction drawings, plans and specifications. No part of any installation shall be covered or used until inspected, corrections made if necessary, and approved by the Fauquier County Health Department or unless expressly authorized by the Fauquier County Health Department. Any part of any installation which has been covered prior to approval shall be uncovered if necessary, upon the direction of the Department.

This authorization to construct a sewage disposal system expires: **November 17, 2007.**

Sincerely,

Ron Bryant, Fauquier County Health

Department
